This is our largest active opportunity this quarter. Meridian's security and compliance teams have been engaged since we opened the deal about June 10, 2026. Our last substantive touchpoint with their VP of Infrastructure was on June 20, 2026, when we walked through the proposed architecture. Given the size of this deal, it's already been flagged internally for extra oversight. Next step: schedule a security review session with Meridian's InfoSec team.
